```
from google.colab import files
import cv2
import matplotlib.pyplot as plt

# Upload image
uploaded = files.upload()
filename = list(uploaded.keys())[0]

# Read image
image = cv2.imread(filename)
print("Image uploaded successfully:", filename)

# Display original image
plt.imshow(cv2.cvtColor(image, cv2.COLOR_BGR2RGB))
plt.title("Original Image")
plt.axis("off")
plt.show()

# Plot color histogram
colors = ['b', 'g', 'r']

for i, color in enumerate(colors):
    histogram = cv2.calcHist([image], [i], None, [256], [0, 256])
    plt.plot(histogram, color=color)

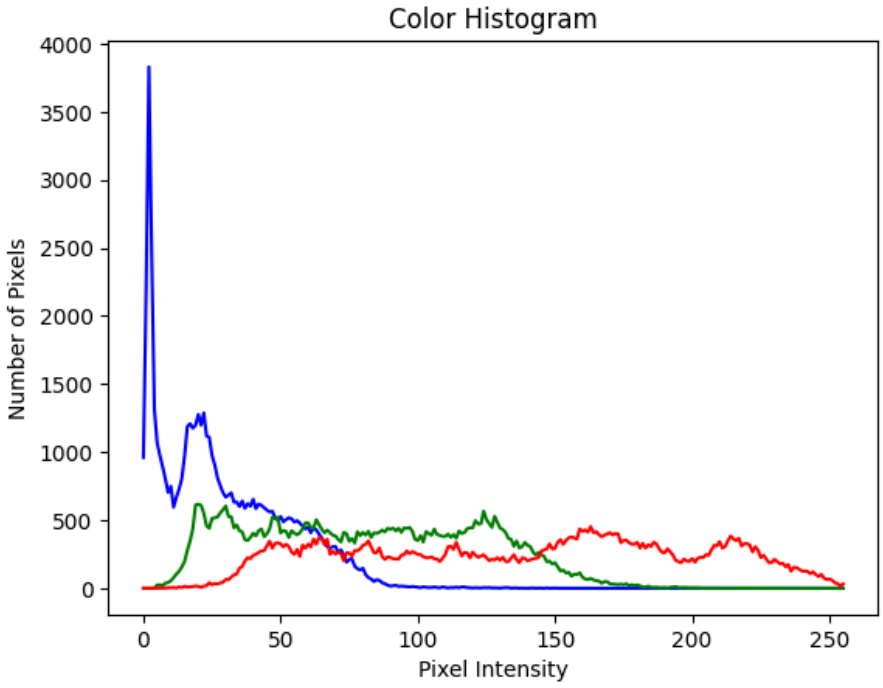

plt.title("Color Histogram")
plt.xlabel("Pixel Intensity")
plt.ylabel("Number of Pixels")
plt.show()
```

What is Colab?

Colab, or "Colaboratory", allows you to write and execute Python in your browser, with

- Zero configuration required
- Access to GPUs free of charge
- Easy sharing

Whether you're a **student**, a **data scientist** or an **AI researcher**, Colab can make your work easier. Watch Introduction to Colab or Colab Features You May Have Missed to learn more, or just get started below!

Getting started

The document you are reading is not a static web page, but an interactive environment called a **Colab notebook** that lets you write and execute code.
